

2019 Community Report:

HCA Far West
Division

Brian Cook, President

**HCA Healthcare
Far West Division**

A Message from the President

Caring for more than 1.2 million patients, HCA Healthcare Far West Division is one of the largest providers of health care in the communities we serve; spanning the Las Vegas, Silicon Valley and Southern California markets. **We Don't Treat Patients, We Treat Neighbors** – with access points that include hospitals, free-standing emergency rooms, urgent care clinics, and outpatient surgery centers we are able to offer world-class care that's close to home.

HCA Healthcare Far West Division has received **numerous recognitions for patient safety and for our quality clinical measures**. For example recently Leapfrog Hospital Safety Grades were announced. We're pleased to report that many of our hospitals earned top scores when compared to other local healthcare providers. These grades recognize our high standards in patient safety and quality, all while training the next generation of physicians. Most of our hospitals are **accredited by The Joint Commission** – nationally recognized as a symbol of quality that reflects an organization's commitment to meeting certain performance standards. In addition, all of our hospitals are **certified Stroke Centers**. Lastly, having three certified **American College of Surgeons' Level II Trauma Centers** within our family of hospitals demonstrates our commitment to the treatment of traumatic injuries and life-threatening conditions.

We are a major employer of medical and health experts and are over **15,000 employees strong**. We are constantly on the lookout for talented professionals, and our reputation as an excellent employer assures us that we have our pick from the most highly sought-after recruits. We appreciate the support of the more than **5,500 active physicians** who have chosen to have their patients cared for in our hospitals – together, we champion the practice of medicine for a healthier world.

To further the physician footprint within our communities HCA Far West Division is proud to offer **40 physician residency and fellowship programs** allowing us to help expand physician expertise and provide a higher quality of care to the patients we serve.

Care Above All Else. It's not just a slogan, those are the words we live by. In fact, you'll find them right in our mission statement, and they are woven throughout our foundational fabric. We are a part of the Las Vegas, Silicon Valley and Southern California community, and that makes us family. And at every HCA Healthcare family location, there's no doubt that family always comes first.

Sincerely,

Brian Cook, President
HCA Healthcare Far West Division

About HCA

HCA Healthcare founders Dr. Thomas Frist, Sr., Dr. Thomas Frist, Jr. and Jack C. Massey envisioned a company that would bring together hospitals to deliver patient-focused care while using the combined resources of the company to strengthen hospitals and improve the practice of medicine.

The vision they articulated in 1968 was brought to life in their first hospital, Park View Hospital, and continues to guide HCA today. HCA's mission and values reflect our tradition of delivering high-quality, cost-effective care for our people, our patients and our communities.

From our first year of operation, we have seen the application of scale and shared resources as the way to fulfill HCA's mission because greater scale allows for innovation and advances in care. Today, the company stands at the forefront of the healthcare industry with more than 170 hospitals and more than 115 surgery centers in 20 states and the United Kingdom. We are leaders in clinical research, helping to advance medicine and patient care. Our facilities have more than 26 million patient encounters each year, including 8 million emergency room visits.

Providing more than 28 million exceptional patient experiences each year.

**HCA Far West is part of HCA Healthcare,
one of the nation's leading providers of
healthcare services with more than
178 hospitals and 119 surgery centers in
19 states and the United Kingdom.**

Mission & Values

Above all else, we are committed to the care and improvement of human life.

In pursuit of our mission, we believe the following value statements are essential and timeless:

- We recognize and affirm the unique and intrinsic worth of each individual.
- We treat all those we serve with compassion and kindness.
- We trust our colleagues as valuable members of our healthcare team and pledge to treat one another with loyalty, respect and dignity.
- We act with absolute honesty, integrity and fairness in the way we conduct our business and the way we live our lives.

Who We Are

As part of the HCA Healthcare family, HCA Far West is headquartered in Henderson, Nevada, and serves businesses and communities of Nevada and California.

HCA Far West is comprised of 8 hospitals, 2 freestanding ER locations, 9 surgery centers, 19 GME Programs dedicated to keeping California and Nevada healthy.

Our People

HCA Healthcare co-founder Dr. Thomas Frist, Sr. once said, “Bricks and mortar do not make a hospital. People do.” That is still the guiding principle for HCA, from the doctors and nurses tending to patients directly, to the administrators, housekeepers, and other non-clinical staff who contribute to our mission of delivering exceptional care.

HCA Far West’s employees enjoy a work environment that promotes diversity, inclusion and cultural competence. We strive to ensure that everyone is treated with fairness, dignity and respect. Diversity and cultural competence are important to our mission of delivering healthcare excellence. It involves the hearts and lives of our staff, our physicians, our patients and the communities we serve.

Graduate Medical Education

HCA is increasing available residency and fellowship programs across the country by converting a number of its high performing hospitals into teaching hospitals. Our GME programs provide physicians the opportunity to be part of a leading hospital network that is changing the nation's healthcare landscape.

In the Far West Division, we have a strong and robust residency footprint with 18 programs to date including two fellowships and a projection of 16 programs that are underway and will be announced in 2020 and beyond. We offer a tailored curriculum to make our residents the best practitioners in their respective fields with the goal of providing the best healthcare to the communities we serve. We hope to retain these physicians within the local community after their training is complete.

The HCA Healthcare standard is a solid foundation for physicians to learn and practice medicine the way it was intended: patient-centered, constantly evolving and improving. HCA Healthcare's wealth of expertise, resources and size provides residents with a personalized, innovative, evidence-based training celebrating teamwork, collaboration and unity.

With over 250 residency and fellowship programs across the enterprise, we are proud to use our resources to continue building the largest network in the country.
